Ripcord® Xtra

Insecticide

A high performance residual insecticide for the control of a wide range of pests

Ripcord® Xtra is a new, improved, high-performance formulation of a trusted New Zealand product providing greater control and treatment flexibility. The formulation's unique micro-crystalline particles provide superior surface adherence and residual action so pest controllers can rely on Ripcord Xtra to control a large variety of difficult insect pests.

- Broad spectrum control for use in domestic, commercial, agricultural and public health applications
- Rapid knockdown and superior efficacy delivering the signs of sensitisation within 5 minutes, and knockdown within 30 minutes
- New low dose formulation minimising costs whilst maximising results
- Superior residual action resulting in even surface coverage and excellent adherence to porous and other difficult surfaces
- Micro-crystalline formulation promotes bio-availability of the active resulting in superior control of difficult pests

We create chemistry

Ripcord[®] Xtra

Insecticide

Ripcord Xtra controls insects by contact action and ingestion, and when applied as a surface spray offers long residual activity. Ripcord Xtra insecticide can be applied with conventional spray equipment used to control public health pests. Its formulation provides superior surface adherence via the formation of micro-crystalline particles, providing improved levels of control (knockdown and residual) when compared to other insecticides.

This new and advanced formulation of Ripcord Xtra is now available in a convenient 1L pack and is suitable for use in and around domestic households, industrial and commercial establishments. Ripcord Xtra is also registered for use around agriculture buildings.

FAQ's
