Termidor® 100SC

Insecticide

The gold standard in ant and general insect control

Termidor® 100SC Insecticide provides professional pest controllers superior levels of control across a broad range of external pests including ants, cockroaches, spiders and flies.

- Advanced non-repellent technology enabling reduced application and cost savings
- Broad spectrum activity for the control of a wide range of crawling pests
- Treatment flexibility enables a uniquely targeted use pattern in conjunction with bait treatments
- Termidor's unique Transfer Effect™ ensures total colony or population control

We create chemistry

Termidor® 100SC

Insecticide

Termidor has been designed using non-repellent technology, providing significant advantages over other inferior insecticides including reduced insecticide use, unsurpassed efficacy and superior residual characteristics. Termidor's unique Transfer Effect™ ensures the powerful active ingredient can be passed effectively throughout the pest population, so pests continue to interact with the insecticide without detection or disruption in behavior – leading to unrivalled levels of efficacy, long-term residual control and reduced call backs.

| SITUATION | PEST | RATES | REMARKS |
|---|---|---|--|
| External areas and surrounds of domestic, commercial, public and industrial buildings and structures. | Nuisance Ants | 6mL in 1L of water | Treat surfaces 300 mm up and 300 mm out from where the building or structure touches the ground. Apply at the rate of 1 litre of spray mix per 25 lineal metres. Pay particular attention to potential entry points, such as weep holes, cracks and crevices. Also apply to ant trails and where ants are active away from the nest. Structures may include retaining walls, fences, garden borders, sheds etc. |
| Spot application to nests in domestic situations. | Nesting ants | | Treat the nest entrance or mound, and where ants are active away from the nest. Apply at the rate 1 litre of spray mix per 16 m ² , or 60 ml per m ² . |
| External areas and surrounds of domestic, commercial, public and industrial buildings and structures | Domestic Cockroaches | 6mL in 1L of water | Treat external surfaces 300 mm up and 300 mm out from where the building or structure touches the ground. Apply at the rate of 1 litre spray mix per 25 lineal metres. Pay particular attention to potential entry points, such as weep holes, cracks and crevices. Also apply to where pest(s) may be active away from the building including retaining walls, fences, garden beds, sheds etc. Apply at the rate of 1 litre of spray mix per 16 m ² . |
| | Web-spinning spiders | | Spray spiders, their webbing and areas where spiders may hide at the rate of 1L of prepared suspension per 16m ² . |
| | Daddy-long-legs spiders, Earwigs, House Crickets, Millipedes, Slaters | | Apply directly onto spiders, millipedes, house crickets, earwigs and slaters as a spot treatment. |
| External covered areas of domestic, commercial, public and industrial buildings and structures. | Houseflies | 6mL in 1L of water | Apply to external surfaces where flies are likely to rest at the rate of 1 litre of spray mix per 16 m ² . |
| Pre-construction, Post-construction, Reticulation systems, protection of poles and fence posts, nests in poles and trees, wall cavity treatment | Termites | 600 mL in 100 litres water (0.06% a.i. mix) | Application by LICENSED PEST CONTROL OPERATORS: Contact BASF for specific application advice. |

Refer to the product label for full directions of use.

Packaging

Available in 1 Litre bottles
